DETAILED ACTION

Response to Arguments

Applicant contends in a Preliminary Amendment filed January 19, 2001 that claims 1-20 were canceled; this is incorrect. Claims 22-27 were canceled. Pursuant to Rule 1.126, claims 22-28 were renumbered consecutively to follow the original claims, resulting in the claims being correctly numbered 21-27. Hence the cancellation of claims 22-27, left claims 1-27. The subsequent cancellation of claims 11-20 in the second Preliminary Amendment filed March 12, 2001 resulted in the application having one outstanding process claim.

Thus applicant's contention that the Office Action of March 13, 2002 was directed to claims that were not active in the subject application is mistaken.

Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-10 drawn to device, classified in class 257, subclass 678.
- II. Claim 21, drawn to process of manufacture, classified in class 438, subclass 106.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product as claimed can be made by another

Art Unit: 2827

and materially different process, such as without electrically connecting a top of a circuit board through a side surface terminal of an integrated circuit package.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143). Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
